

INTRASOFT INTERNATIONAL

Creating Value Together

Demonstration of the Envimpact database and of the CEE R&D maps

INTRASOFT Intl S.A.
Research & Innovation Unit
Dr. Raimund Bröchler

- Why: Increase awareness on CEE research practices and results in the field of air pollution, chemical pollution and environmental technologies by presenting those results
- How: The information collected throughout the project is displayed in a clear and structured approach.
- Tools: Map, Database, News, Newsflash
 - Map contains a graphical representation of the distribution of research results in the CEE countries.
 - Users are able to perform map-based search, and manage the information in the database.
 - Map, directly links to the database, and allows automatic updates allowing further expansion
 - News article published

- Iterative process with various steps
 - Development of research profile datasheet for the research results
 - Development of online datasheet (additional data specification)
 - Development of guidelines for the selection of the collected research results
 - Selection of research practices and results
 - Two-Step validation of results
 - Publication of datasheet

- Database and maps are online
 - 562 Profiles in total
 - ENVIMPACT 428 profiles / PROCEED 134 profiles
 - http://www.envimpact.eu/databases/interactive_map.cfm OR
<http://www.envimpact.eu/databases/results.cfm>
- News article published
 - http://www.envimpact.eu/index.cfm?action=article&publication_id=802
- Additional datasheets can be still added
 - 2-Step validation is still possible for new datasheets until the end of the month.
 - Afterwards 1-step validation

THANK YOU FOR YOUR
ATTENTION
